

概念题

已经考过的

Software Testing
Static Whitebox Testing
TDD
V Model
W Model
Validation & Verification
Drivers & Stubs
Error Guessing
Bug Report
Volume Testing
Bottom-up integration
Scenario testing
Load testing
Acceptance testing
Version Control

没考过的

讲义打☀号的
讲义标题为“什么是...”的
老师上课特意强调的

简答题

考过的

1. Why software testing is not just a technical problem
2. Test Planning Process
3. Why do we need automated testing?
4. What are the major maintenance activities?
5. TDD, advantage
6. What's Unit testing? Who is responsible for? What is the process of unit testing?
7. What's regression testing?
8. What is Software Testing Automation?
9. What is Software Maintenance? List Categories of software maintenance. List some methods to improve the maintainability of the system?
10. Bug management process
11. The process of Software Configuration Management
12. Relationship between specification and bugs
13. Relationship between Software Testing and SQA
14. Difference between Top-down and Bottom-up

15. How to finish unit testing?

16. How to understand "No bugs will be fixed"?

没考过的

简答题太玄学了，你永远不知道会在哪一题埋伏然后“偷袭”。

白盒和黑盒

测试讲义已经写得很详细了，不重复

场景题（能不能认为是固定四大问呢）

1. functional testing strategy
2. system performance testing strategy.
3. testing process
4. testing document.

软件维护类型（改正性/适应性/完善性/预防性维护）

测试流程（单元测试→集成测试→系统测试→验收测试）

验收测试流程（兼容性测试要点、用户参与环节）

维护困难与可维护性提升方法（文档规范、结构化设计）
